

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Secondary School Certificate	New Horizon Public School	85	2017-2019
Higher School Certificate	New Horizon Public School	86.2	2019-2021
Bachelor of Engineering	Vidyalankar Institute of Technology, Mumbai University	8.93/10	2021-2025

WORK EXPERIENCE

- **CYAHLO**

Feb 2025 - Apr 2025

AI/ML Internship

Remote, Navi Mumbai, India

– Built and trained a **DCGAN model** for image synthesis, gaining hands-on experience with **generative adversarial networks**.

– Customized pre-trained **Huggingface** model for domain-specific image generation using **transfer learning**.

– Led the development of an **end-to-end Image Tag Generator** using **Django**, **AWS** deployment and **SageMaker** hosting.

– Created **2 Django APIs (upload, tags)** and deployed **3 SageMaker endpoints** to serve models for real-time utilization

PROJECTS

- **Image Tag Generator**

2025

Python, Django, PyTorch, MySQL, Scikit-learn, AWS

– Built an **image tag generation system** using Django, PyTorch, Scikit-learn, enabling **real-time tag prediction via REST APIs**

– Deployed **ResNet-based models** on AWS SageMaker with image storage on S3 and **serverless execution via AWS Lambda**, ensuring scalability and low latency

– Designed and executed **dataset preprocessing pipelines** to improve model accuracy and reliability in production.

– Gained experience with **end-to-end AWS deployment**, leveraging EC2, S3, Lambda for a fully integrated cloud solution
- **CpContestAggregator**

2025

Django, Reachjs, API Integration, Scraping, Celery

Github

– Built a full-stack CP Contest Aggregator using **Django REST API** and **React**, aggregating contests from 4 platforms (Codeforces, AtCoder, Codechef, Leetcode.)

– Enabled auto-scraping 12 hours using **Celery + Celery Beat** with Upstash **Redis**, ensuring up-to-date contest info.

– Integrated **Google Calendar API** to let users add contests to calendars in **one click**, improving scheduling convenience.
- **Neural Network from Scratch**

2023

Neural Networks, NumPy, Pandas, Computer Vision

– Built a custom neural network for handwritten digit recognition from scratch using **NumPy** and **Pandas**.

– Recognizes digits (0–9) from user-provided images for interactive apps.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML/CSS
- **Frameworks:** React, Django, Bootstrap, TensorFlow, PyTorch
- **AI Skills:** NLP, Computer Vision, Agentic AI, GenAI, Prompt Engineering, RAG, Copilot
- **Systems and Tools:** AWS, Docker, Google Cloud, Figma, Git, PowerBI, Postman
- **Database:** MySQL, MongoDB

KEY COURSES TAKEN

- **ComputerScience Courses:** Data Structure & Algorithm , Object Oriented Programming , DBMS, OS, CN
- **DataScience Courses:** Machine Learning, DataMining, Artificial Intelligence, NLP, Social Media Analysis

ACHIEVEMENTS AND CERTIFICATIONS

- **Competitive Programming:**

1. **CodeChef: 4* Star** rated coder with **1871(Max)** rating points. [handle **aayushs16**]

2. **CodeForces: Specialist** with the rating of **1573(Max)**. [handle **aayush.s1602**]
- **Recursion 3.0 Hackathon, Secured 2nd Position**

Built a comprehensive help desk system for a bank using **Django** backend, **Tailwind CSS** frontend, **Figma** for UI.

2022
- **Deep Learning Specialization (DeepLearning.AI),**

Covered neural networks, CNNs, sequence models, backpropagation, optimization, and real-world applications.

2023
